

Chlorides Formation (P<sub>0</sub> = 101325 Pa)

Equilibrium values  
at 1000 °C

| Element | $\Delta G^\circ$ (kJ/mol) | P(Cl2) (Pa) |
|---------|---------------------------|-------------|
| AL      | -338.6                    | 2.07e-13    |
| FE      | -87.4                     | 2.7         |
| SN      | -156.7                    | 6.65e-04    |
| CU      | -175.4                    | 6.97e-05    |
| Y       | -496.9                    | 1.11e-21    |
| ZR      | -358.3                    | 1.94e-14    |
| CA      | -632.2                    | 9.60e-29    |
| C       | 33.1                      | 5447199.6   |
