

Sulfides Formation (Base P = 101325 Pa)

Equilibrium values  
at 1000 °C

| Element | $\Delta G^\circ$<br>(kJ/mol) | P(S2)<br>(Pa) |
|---------|------------------------------|---------------|
| AL      | -327.6                       | 3.68e-09      |
| FE      | -105.0                       | 5.0           |
| SN      | -122.6                       | 0.9           |
| CU      | -184.6                       | 0.0           |
| C       | -22.1                        | 12520.7       |
